

Service de chirurgie orthopédique et traumatologie

Mini-symposium

Orthopedic considerations around rare bone disorders

Jeudi 19 mars 2026, 17h
Auditoire Paternot,
Agora, CHUV
Suivi d'un apéritif

Le Service de chirurgie orthopédique et traumatologie a le grand privilège d'accueillir le Pr Kassim Javaid et le Pr Georges Finidori le 19 mars 2026 à 17h pour son mini-symposium.

Pr Kassim Javaid

Professor of Osteoporosis and Adult Rare Bone Diseases, University of Oxford and an honorary consultant adult rheumatologist at Oxford University Hospitals NHS Foundation Trust.

He specializes in common and rare metabolic bone diseases. He is the clinical lead for the national Fracture Liaison Service Audit for England and Wales, the Oxford Rare bone disease service for adults and co-chairs Rare Disease Collaborative Network for Adult Rare Bone Diseases. His research interests include the epidemiology of rare bone disorders and secondary fracture prevention.

Pr Georges Finidori

Orthopedic surgeon specializing in the surgical management of rare bone diseases and their complications. He practiced primarily at Necker Enfants-Malades Hospital in Paris. His work has focused on constitutional bone disorders, with particular expertise in their operative treatment, developed within a multidisciplinary framework and in close collaboration with the Imagine Institute in Paris.
